

JComponent

ActionListener

Structs.Edit.StudentEdit

```
graph BT; StudentEdit[Structs.Edit.StudentEdit] --> JComponent[JComponent]; StudentEdit --> ActionListener[ActionListener];
```

The diagram illustrates a class hierarchy where the `Structs.Edit.StudentEdit` class inherits from both the `JComponent` class and the `ActionListener` interface. The inheritance is represented by arrows pointing from the `Structs.Edit.StudentEdit` box to the `JComponent` and `ActionListener` boxes.
